SECTION 2 — CRITICAL GAPS (Priority Fixes Needed)

❌ ACCURACY ISSUES (Fix Before Any New Features)

Issue	Impact	Fix Required
Swiss Ephemeris not used — chart uses hardcoded approximation, not real planetary calculation	CRITICAL	Integrate real astronomy.js-based calculation OR fix DOB-based planet positions
Dishashool in scoring — mentioned in classical text but not integrated in 5-level score	HIGH	Add as Layer 6 in scoreHora/scoreWindow
Nakshatrashool — classical Muhurta Chintamani verified, not implemented	HIGH	Add 4-nakshatra direction-taboo check
Bhadra Mukh/Puchh — classical nuance (only "face" is bad, "tail" is good) not implemented	MEDIUM	Update Bhadra detection logic
Panchak — not found in primary source, but widely-used concept	MEDIUM	Research needed, then implement
